

**Over 1,000,000,000 m²
of Proven Performance**

The first Firestone EPDM roof installed in Wisconsin, USA, in 1980, is living proof of the durability of Firestone EPDM roofing systems. Since then, over 1,000,000,000m² of Firestone EPDM membranes have been installed on roofs from the cold climates of Alaska to the desert sun of the Arabian Gulf.

A Century of Experience in Rubber

Firestone EPDM Roofing Systems are manufactured by Firestone Building Products Company, a division of Bridgestone/Firestone Diversified Products LLC. The company is backed by more than a century of experience in rubber technology
